Dear Dr. Goldforb:-

With reference to the article submitted for publication by Doctors S. Hertz and Arthur Roberts, a change is desired with the addition of Professor Hoble D. Evans as a third co-author. He has shared considerably in the time devoted to this problem and we have decided that full credit to the Massachusetts Institute of Technology cannot be given without including him as co-author. His title is Assistant Professor of Physics at Massachusetts Institute of Technology and we would appreciate the addition to the authorship of his name in the publication. At the end of the present manuscript we have made acknowledgement to Professors Means and Evans so that making Professor Evans a co-author makes the acknowledgement read; "We are deeply indebted to Professor J.H. Means for his stimulating interest in this work".

Very truly yours,

Dr. S. Hertz
